Claim Objections

1. Claims 5-6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple depend claims. See MPEP § 608.01(n). Accordingly, claims 5-6 have not been further treated on the merits.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siegel (US 3,913,734) in view of Redmond (US 6,085,942). Siegel discloses a packaging unit for a flowable product comprising first and second walls at least one of which is concave and which are sealing joined along their respective edges and define therebetween a cavity containing the flowable product. At least of the walls being provided with a severing indicating means 40, severing along a line indicated by the severing indicating means and extending from side-to-side across the packaging unit opening a product outlet portion of the cavity. The severing indicating means, however, does not have a curvedly convex profile projecting away from the cavity. But Redmond teaches curved lines as shown in Figures 1A-1E to sever the package to form a dispensing portion. The center of the curved line has a rectilinear middle zone. It would have been obvious in view of Redmond to form a variety of severing indicating means from straight line to curved line for ease of dispensing.
